

Activities covered by this assessment:	Trials – Covid-19 Risk Assessment									
Location:	Stathams Quarry Matlock DE4 5LZ on the A632 to Chesterfield.									
Assessor:	AMCA – Adapted by Suzanne Stubbs									
Date:	Sunday 1st November 2020									
Key:	L= Likelihood (1-5), S= Severity(1-5), R=Risk (LxS) LR=Low Risk(1-4), MR= Medium Risk (5-10), HR = High Risk (>10)									
Task/Who Might be Harmed?	How Might People be Harmed?	Hazard	Initial Risk Rating (SxL)			Controls Measures	Final Risk Rating (SxL)			Person to Control Risk
			L	S	R		L	S	R	
Officials Signing On Who may be harmed? All officials especially clinically vulnerable people	Mild / severe illness and in severe case death. People can catch the virus from others who are infected in the following ways; 1. Virus moves from person to person in droplets from the nose and mouth, spread when a person with the virus coughs or exhales. 2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc. 3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.	Close contact between individuals during officials briefing on the day of events	3	5	15	Ensure that all officials maintain 2m of separation during briefings. Provide a loudspeaker or use PA system to ensure briefing is heard correctly over increased distances. Use questions to ensure briefing is understood correctly. Request that all officials wash hands regularly with sanitiser or soap and water.	1	5	5	Suzanne Stubbs
Officials Signing On Who may be harmed? All officials especially clinically vulnerable	Mild / severe illness and in severe case death. People can catch the virus from others who are infected in the following ways; 1. Virus moves from person to person in droplets from the nose and mouth, spread when a person with the virus coughs or exhales.	Close contact whilst signing documents and risk assessments	4	5	20	Where documents must be passed between parties, the document is to be handled with care. Consider the use of gloves. Each signatory supplied with a pen to avoid cross contamination.	1	5	5	Suzanne Stubbs

people	<p>2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc.</p> <p>3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.</p>									
<p>Riders signing on</p> <p>Who may be harmed? All officials especially clinically vulnerable people</p>	<p>Mild / severe illness and in severe case death.</p> <p>People can catch the virus from others who are infected in the following ways;</p> <p>1. Virus moves from person to person in droplets from the nose and mouth, spread when a person with the virus coughs or exhales.</p> <p>2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc.</p> <p>3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.</p>	Close contact whilst signing into the meeting, handling of signing on sheets	4	5	20	<p>Configure the signing in area such that at least 2m separation is always maintained whilst queuing. Request that all riders wash hands on approach to signing on location. Use of table to maintain social distancing. Rider to have pre-entered. Provide hand sanitiser before and after the riders sign on. Riders to wear face coverings when approaching signing on. Officials to wear Perspex face guard whilst signing on and face covering. Riders to bring their own pens/ Each signatory supplied with a pen to avoid cross contamination.</p>	1	5	5	Suzanne Stubbs
<p>Rider Entry</p> <p>Who may be harmed? All officials and riders, especially clinically vulnerable people</p>	<p>Mild / severe illness and in severe case death.</p> <p>People can catch the virus from others who are infected in the following ways;</p> <p>1. Virus moves from person to person in droplets from the nose and mouth, spread when a person with the virus coughs or exhales.</p> <p>2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on</p>	Handling of large volumes of Cash	3	5	15	<p>Riders should pre enter only. Payment by cheque or correct money if necessary on the day. All payments quarantined for 72 hours.</p>	1	5	5	Suzanne Stubbs

	<p>etc.</p> <p>3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.</p>									
<p>Injury Management/ First Aid</p> <p>Who may be harmed? All officials, medical contractors and riders, especially clinically vulnerable people</p>	<p>Mild / severe illness and in severe case death.</p> <p>People can catch the virus from others who are infected in the following ways;</p> <p>1. Virus moves from person to person in droplets from the nose and mouth, spread when a person with the virus coughs or exhales.</p> <p>2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc.</p> <p>3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.</p>	<p>Putting the NHS under additional pressure due to injury to riders. Additional PPE requirements</p>	3	5	15	<p>Resume activity at the appropriate time in accordance with government advice.</p> <p>Maintain awareness of government guidance.</p> <p>Practice events as an alternative to avoid risks associated with competition</p> <p>First aiders are to wear appropriate PPE at all times whilst treating injuries.</p>	1	5	5	Suzanne Stubbs
<p>Paddock spacing</p> <p>Who may be harmed? All officials and riders, especially clinically vulnerable people</p>	<p>Mild / severe illness and in severe case death.</p> <p>People can catch the virus from others who are infected in the following ways;</p> <p>1. Virus moves from person to person in droplets from the nose and mouth, spread when a person with the virus coughs or exhales.</p> <p>2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc.</p> <p>3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.</p>	<p>Close contact when parked in the paddock</p> <p>Lack of adequate space in paddock.</p>	3	5	15	<p>Ensure vehicles are parked to allow social distancing.</p> <p>Pre entry and restricted number of competitors and to understand attendance</p> <p>Entry numbers shall be strictly limited to the paddock space available to ensure social distancing can be maintained.</p>	1	5	5	René Stubbs

<p>Riding</p> <p>Who may be harmed? All officials, and riders, especially clinically vulnerable people</p>	<p>Mild / severe illness and in severe case death.</p> <p>People can catch the virus from others who are infected in the following ways;</p> <p>1. Virus moves from person to person in droplets from the nose and mouth, spread when a person with the virus coughs or exhales. 2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc. 3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.</p>	<p>Close contact during riding activity Close contract between riders in between sections</p>	3	5	15	<p>Rider briefing regarding social distancing. Megaphone to ensure all riders receive adequate briefing. Riders to wear gloves, goggles, helmets whilst on riding Ensure riders maintain social distancing by only allowing a max, 3 riders at any section.</p>	1	5	5	<p>Suzanne Stubbs and René Stubbs</p>
<p>Covid-19 General</p> <p>Who may be harmed? All officials and riders, especially clinically vulnerable people</p>	<p>Mild / severe illness and in severe case death.</p> <p>People can catch the virus from others who are infected in the following ways;</p> <p>1. Virus moves from person to person in droplets from the nose and mouth, spread when a person with the virus coughs or exhales. 2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc. 3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.</p>	<p>Lack of awareness of risks and control measures</p> <p>Self Isolation – showing symptoms.</p>	3	5	15	<p>Provide information via signage at the signing in location and entrances. Anyone who is not following the rules will be asked to leave</p>	1	5	5	<p>Suzanne Stubbs and René Stubbs</p>
<p>Covid-19 General</p> <p>Who may be harmed? All officials and riders, especially clinically vulnerable people</p>	<p>Mild / severe illness and in severe case death.</p> <p>People can catch the virus from others who are infected in the following ways;</p> <p>1. Virus moves from person to person in droplets from the nose and mouth, spread when a person with the virus coughs or exhales. 2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc. 3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.</p>	<p>Self Isolation – showing symptoms.</p>	2	5	10	<p>Anyone attending an event that is showing any symptoms of Covid-19 will be asked to leave the event with immediate effect. AMCA communications to specify that anyone showing symptoms should self-isolate in accordance with government guideline and advice regarding the control above</p>	1	5	5	<p>Suzanne Stubbs and René Stubbs</p>
<p>Spectators</p> <p>Who may be harmed? All officials, riders and</p>	<p>Mild / severe illness and in severe case death.</p> <p>People can catch the virus from others who are infected in the following ways;</p> <p>1. Virus moves from person to person</p>	<p>Risk of transmission due to large numbers of attendees</p>	3	5	15	<p>Attendance is to be limited to essential persons only i.e entrants and 1 mechanic. Anyone travelling in the same vehicle must come from the same household.</p>	1	5	5	<p>Suzanne Stubbs and René Stubbs</p>

<p>spectators, especially clinically vulnerable people</p>	<p>in droplets from the nose and mouth, spread when a person with the virus coughs or exhales. 2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc. 3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.</p>					<p>Spectators are respectfully asked to stay away at this time. AMCA office to issue guidance on this point across social media etc following government guidelines.</p>				
<p>Observers</p> <p>Who may be harmed? All officials and riders especially clinically vulnerable people</p>	<p>Mild / severe illness and in severe case death. People can catch the virus from others who are infected in the following ways; 1. Virus moves from person to person in droplets from the nose and mouth, spread when a person with the virus coughs or exhales. 2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc. 3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.</p>	<p>Close contact between observers and riders during events Handling of contaminated score sheets</p>	1	5	5	<p>Sections are to be laid out so that an observer can observe the section without the rider breaching the 2m social distancing requirement Where sheets must be handled the use of sanitisers is recommended. No rider self observation so no observer the section while not operate as part of the competition.</p>	1	5	5	<p>Suzanne Stubbs and René Stubbs</p>
<p>Litter Collection</p> <p>Who may be harmed? All officials and riders especially clinically vulnerable people</p>	<p>Mild / severe illness and in severe case death. People can catch the virus from others who are infected in the following ways; 1. Virus moves from person to person in droplets from the nose and mouth, spread when a person with the virus coughs or exhales. 2. The virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc.</p>	<p>Handling of contaminated waste</p>	3	5	15	<p>All riders are to be briefed regarding the disposal of litter, riders are to take their own litter home Wearing of gloves is required for handling all litter. Where possible use a litter grabber.</p>	1	5	5	<p>Suzanne Stubbs and René Stubbs</p>

	3. People can contract the virus by breathing in droplets or by touching contaminated surfaces and then touching their eyes, nose or mouth.
